Back Panel

The USG-XG-8 includes one hot-swappable AC/DC PSU module. An optional AC/DC PSU module can be installed in the *PSU 2 Module Bay*.

You also have the option to use a DC/DC PowerModule™, model RPS-DC-100W (sold separately).

 **Note:** There are ventilation holes on the sides of the UniFi Security Gateway XG.

Installation Requirements

- Phillips screwdriver
- Standard-sized, 19" wide rack with a minimum of 1U height available
- For indoor applications, use Category 5 (or above) UTP cabling approved for indoor use.
- For outdoor applications, shielded Category 5 (or above) cabling should be used for all wired Ethernet connections and should be grounded through the AC ground of the power supply.

We recommend that you protect your networks from harmful outdoor environments and destructive ESD events with industrial-grade, shielded Ethernet cable from Ubiquiti Networks. For more details, visit: www.ubnt.com/toughcable

WARNING: To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

Note: Although the cabling can be located outdoors, the UniFi Security Gateway XG itself should be housed inside a protective enclosure.

Hardware Installation

The UniFi Security Gateway XG can be placed on a horizontal surface, mounted on a wall, or mounted on a rack.

! **WARNING:** FAILURE TO PROVIDE PROPER VENTILATION MAY CAUSE FIRE HAZARD. KEEP AT LEAST 20 MM OF CLEARANCE NEXT TO THE VENTILATION HOLES FOR ADEQUATE AIRFLOW.

1. Attach the *Mounting Brackets* to the UniFi Security Gateway XG.

2. Attach the UniFi Security Gateway XG to the rack using the four *Mounting Screws*. (If the rack has square slots, then use the *Cage Nuts* with the *Mounting Screws*.)

3. Connect the *Power Cord* to the *AC/DC PSU Module*.

4. Connect the other end of the *Power Cord* to a power outlet.

Connecting Ethernet to LAN

Connect a UFiber 10 Gbps SFP+ optical module and fiber optic patch cable to SFP+ port 1.

For detailed instructions on using SFP+ ports, refer to *Using SFP+ Ports*.

Using SFP+ Ports

Note: Each SFP+ port requires a Ufiber 10 Gbps SFP+ optical module and a fiber optic patch cable.

For information about compatible fiber SFP+ modules, visit: community.ubnt.com/unifi

To use an *SFP+* port:

1. Remove the protective plug covering the *SFP+* port.
2. Plug a compatible fiber module into the *SFP+* port.

3. Connect a fiber optic cable to the fiber module. Then connect the other end of the cable to another fiber device.

Software Installation

Download the latest version of the UniFi Controller software at: www.ubnt.com/download/unifi

From a management station connected to the same Layer-2 network, launch the installer and follow the on-screen instructions.

 **Note:** If you already have UniFi Controller v5.6 or higher installed, go to the section, *Adopting the UniFi Security Gateway XG*.

After you have installed the software and run the UniFi Setup Wizard, a login screen will appear for the UniFi Controller management interface. Enter the *Admin Name* and *Password* that you created in the UniFi Setup Wizard. Then click **Login**.

You can manage your network and view network statistics using the UniFi Controller management interface. For information on using the UniFi Controller software, refer to the User Guide located on our website at: www.ubnt.com/download/unifi

Configuring the WAN and LAN Interfaces Before Adoption

Prior to adopting the UniFi Security Gateway XG, you can access its Configuration Interface via a web browser to configure the WAN and LAN interfaces and the inform URL.

By default, the *WAN* port is set to *DHCP* so it can obtain its network settings from the service provider. The *LAN* port is set to a static IP of 192.168.1.1/24 with *DHCP Server* enabled.

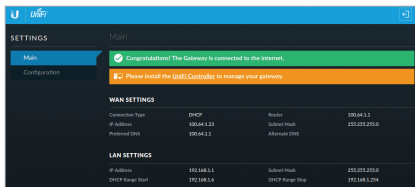

If the UniFi controller is on the local network, access the Configuration Interface and configure the LAN port's *IP Address* to be on the same subnet as your controller.

To change the interface settings, connect a computer (through a switch) to SFP+ port 1 of the UniFi Security Gateway XG.

1. From a web browser, go to: **https://setup.ubnt.com**

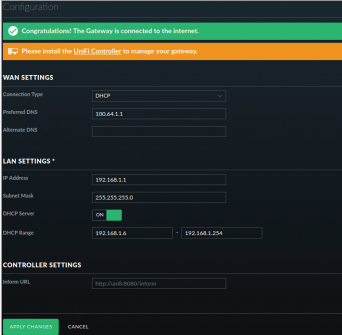

2. The UniFi Security Gateway XG *Settings* window will appear. Click **Configuration** to continue.

The main content area is dark grey with a sidebar on the left containing "Main" and "Configuration". The "Main" section is active, showing a green success message: "Congratulations! The Gateway is connected to the internet." Below this is an orange warning message: "Please install the UniFi Controller to manage your gateway." The "Configuration" section is expanded, showing "WAN SETTINGS" and "LAN SETTINGS".
